(c) February 21, 1989, Letters from R.A. Chrzanowski  
to D. Muller

Dear Dr. Murley:

Commonwealth Edison requested a Technical Specification amendment to the Administrative Controls Section 6.0 for Dresden, Quad Cities, and LaSalle County Stations in reference (a). Since the submittal of the amendment, a major reorganization has been finalized. Due to the reorganization, Commonwealth Edison is withdrawing the proposed amendment.

A revised Technical Specification amendment has been requested in references (b) and (c) for the six Commonwealth Edison Nuclear Stations. These proposed amendments remove the organizational charts in accordance with Generic Letter 88-06. The lines of authority, responsibility, and communications shall be established and defined for the highest management levels through the intermediate levels to and including all operating organization positions. These relationships shall be documented and updated,

as appropriate, in the form of organization charts, functional descriptions of department responsibilities and relationships, and job descriptions for key personnel positions. These requirements shall be documented in the Commonwealth Edison Quality Assurance Manual or the uncontrolled Management Plan for Nuclear Operations, Section 3 Organizational Quality, Activities; Section 6 Interdepartmental Relationships.

Please direct any questions you may have concerning this matter to this office.

Very truly yours,

R.A. Chrzanowski  
Nuclear Licensing Administrator
