Subject: RAI, Sources, Qualification, and Services

Discussion: I discussed that item in Table 1, Element 1 still did not seem to match the SS&D. After discussion, I asked that they verify with the device manufacturer that each source manufacturer and model number was the same source manufacturer and model number.

I then requested that they send me what the minimum qualification is for personnel that are voting members of the Radiation Safety Committee.

I also asked about the services that they provide to others. Mr. Goldberg said that they are only doing these services for other Department of the Army but would like to be open to service others. I discussed that there are codes which translate into fees in order to provide services to others. I stated that if the codes would change, I would inform him.

Action Required: Mr. Goldberg would send me a letter describing the minimum qualifications for voting member of the Radiation Safety Committee and verify the sources in one of their calibrators.
