Dr. Thomas E. Murley, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Quad Cities Station Units 1 and 2
Dresden Station Units 2 and 3
Reactor Level Reference Log Modification
Schedule Generic Letter 84-23
NRC Docket Nos. 50-254/265 and 50-237/249

References (a): Letter from G.L. Alexander to H.R. Denton
dated December 4, 1984

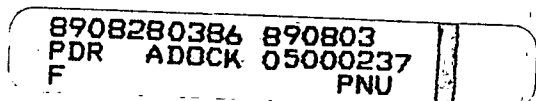

(b): Letter from I.M. Johnson to T.E. Murley
dated July 1, 1988.

Dr. Murley:

Reference (a) provided a response to Generic Letter 84-23 which requested information on reference leg overheating and mechanical level indication equipment replacement. Reference (b) provided a schedule for completion of the modification for Quad Cities Units 1 and 2.

The implementation of the modification for rerouting the reactor water reference leg for Dresden Units 2 and 3 is currently scheduled for the twelfth refueling outage on both units. The twelfth Refueling Outage for Units 2 and 3 is currently schedule for September, 1990 and March, 1991, respectively.

The reactor level reference leg reroute modification is currently scheduled for the eleventh Refueling Outage at Quad Cities Units 1 and 2. The eleventh Refueling Outage for Units 1 and 2 is currently scheduled for October, 1990 and June, 1991, respectively.

The current schedule was developed to assure ample time to provide for mandatory walkdowns of the drywell which are required prior to finalizing the design and installation. Since the drywell is inaccessible during normal operations, limited opportunity to verify the modification design is available.

Please direct any questions you may have regarding this matter to this office.

Very truly yours,

R. Stols
Nuclear Licensing Administrator
