Docket No. 50-237

Docket No. 50-249

Commonwealth Edison Company  
ATTN: Mr. Cordell Reed  
Senior Vice President  
Post Office Box 767  
Chicago, IL 60690

Gentlemen:

This refers to a meeting which I and members of my staff conducted with representatives from your corporate office and Dresden station regarding radiological conditions in the Unit 2/3 Radwaste Building at the Dresden station. This meeting was held in the Region III office on September 20, 1989. The purpose of this meeting was to understand the current contamination status of the Dresden radwaste sludge tank and spent resin tank rooms and your plans for initiating action to cleanup the rooms.

The enclosed copy of our report describes the subjects discussed during the meeting.

During the meeting, you agreed to provide us with specific information, as follows: (1) your schedule for cleanup of the radwaste sludge tank and the spent resin tank rooms; (2) the groundwater level relative to these rooms; and (3) your determination as to whether any of the changes made thus far with regard to radwaste operations, including operation of the sludge tanks, resulted or should have resulted in 10 CFR 50.59 reviews. Please respond in writing to these issues within 30 days of the date of this letter.

In accordance with Section 2.790 of the NRC's rules of practice, Part 2, Title 10, Code of Federal Regulations, a copy of this letter, the enclosure, and your response to this letter will be placed in the NRC's public document room.

We appreciate your cooperation in meeting with us on this issue. If you have any questions regarding this report, we would be pleased to discuss them with you.

Sincerely,

Charles E. Norelius, Director  
Division of Radiation Safety  
and Safeguards
