Supplemental Response to Generic Letter 89-16  
Staff's Backfit Analysis Regarding  
Installation of a Hardened Wetwell Vent  
NRC Docket Nos. 50-237 and 50-249

- References: (1) J.G. Partlow (NRC) letter to T.J. Kovach (CECo),  
NRC Staff Response to the July 24, 1990  
BWROG Presentation Regarding Hardened Vents,  
dated August 20, 1990.
- (2) C. Reed (CECo) letter to Dr. T.E. Murley dated  
September 4, 1990.

Dear Sir:

Reference (1) requested that CECo volunteer to install a hardened wetwell vent without delay at Dresden Station. In addition the Staff response indicated that an Order would be issued requiring hardened vent installation if CECo did not volunteer to do so prior to September 4, 1990.

Reference (2) indicated that CECo would commit to install a hardened vent at Dresden Station as requested by Reference (1). At the time Reference (2) was issued, a definitive date for completion of the hardened vent installation at Dresden was not available. CECo has subsequently made that determination and will complete the installation of a hardened vent at Dresden Station prior to January 1, 1993.

You or your staff should direct any questions that may arise concerning this matter to me at 708/515-7292.

Respectfully,

Darrell Taylor
