JUL 19 2017

William S. Gooch
Radiation Safety Officer
Medical Outsourcing Solutions
1735 Dekalb Avenue
Sycamore, IL 60178

Dear Mr. Gooch:

Enclosed is Amendment No. 3 to your NRC Material License No. 12-35254-01 in accordance with your request.

This amendment adds a new location of use at Gibson General Hospital (GGH) in Princeton, Indiana to your license, concurrent with the termination of the NRC license for Gibson General Hospital, 13-18524-01. This was done in accordance with your letters dated April 26, 2017, May 10, 2017, June 7, 2017 and July 11, 2017. The termination for GGH has been sent under separate cover.

As discussed in telephone conversations between you and me on June 7, 2017, June 29, 2017, and July 11, 2017, GGH's only nuclear medicine technologist (NMT) retired on May 1, 2017. Since that date, your company has provided uninterrupted nuclear medicine services to GGH by staffing one of your NMT's there.

Since licensed activities have continued at GGH, a direct merger of GGH into the license for Medical Outsourcing Solutions (MOS) was planned. This amendment is the result of that plan. No final status surveys were necessary due to licensed activities being conducted continuously while the amendment and termination requests were pending completion.

Please note that, in the course of conducting this review, we examined your enforcement history. During our July 12, 2016, inspection, our inspector noted that a local radiopharmacy delivered licensed material to your client's locked radioactive package receipt area and that sometimes, delivery took place when your NMT was not present. In those circumstances, your client's Radiology Manager provided access to your client's locked radioactive package receipt area.

In your letter dated April 26, 2017, to add GGH to your license, on page 39, the following is stated, part: "RECEIVING RADIOACTIVE MATERIAL: Under no circumstances, the Hospital employees will be involved with the handling or the receipt of a radioactive package or container."

From this, it appears that your license prohibits the involvement of your client's staff, such as a Radiology Manager, etc. in the receipt of licensed materials for GGH. The Radiopharmacy courier only is responsible for obtaining the appropriate key and securing the package in the locked radioactive package receipt area.

This is intended to serve only as a reminder of the commitments made in your license and how they translate into our expectations regarding compliance.

If our understanding in this matter is incorrect, please contact me immediately at 630-829-9841.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

If you have any questions concerning this amendment please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841. My fax number is 630-515-1078.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

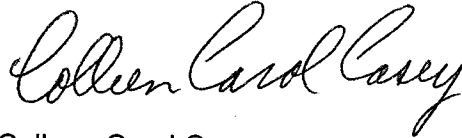

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

W. Gooch

- 3 -

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
