

AUG 20 1970

Mr. Harlen K. Hoyt, Superintendent  
Dresden Nuclear Power Station  
Commonwealth Edison Company  
R. R. #1  
Morris, Illinois 60450

Dear Mr. Hoyt:

We have reviewed your letter, dated February 13, 1970 requesting that the Division of Reactor Licensing use the General Electric Nuclear Power Plant Simulator for the startup portion of the operating test for applicants seeking licenses on Dresden Nuclear Power Station Unit No. 2.

Based on our review of the letter and supplemental information, dated May 18, 1970 we have determined that your request is in accordance with 10 CFR Part 55, providing each applicant meets the following minimum experience and training prerequisites.

1. Each applicant shall have at least one years' operating experience in a responsible position at a fossil or nuclear power plant. Operating experience at military nuclear power plants and AEC operated production facilities shall be considered comparable experience.
2. Each applicant shall successfully complete a Basic Nuclear Fundamental Course prior to attending the GE Training Center.
3. Each applicant shall successfully complete the twelve (12) week training program at the GE Training Center as evidenced by a Certificate from General Electric.
4. Each applicant shall spend a minimum of three months on the operating staff of the Dresden 2 Unit after completing the GE training program. During this time each applicant

shall manipulate the controls of the Dresden 2 reactor through five (5) significant reactivity changes. These reactivity changes may consist of any combinations of the following:

- a. Reactor startup
- b. Orderly reactor shutdown
- c. Power changes of at least 10% with the reactivity control systems on manual.

This procedure shall be put into effect after the Dresden Unit No. 2 startup and test program data are factored into the simulator models.

Sincerely,

*1st Peter A. Morris*

Peter A. Morris, Director  
Division of Reactor Licensing
