Secretary  
Office of the Secretary of the Commission  
Washington, DC 20555-0001

**RE: 5-day Report, NRC Order July 14, 2017, Docket No. 040-7580,  
License SMB-911, EA-17-102**

Dear Secretary:

As required by Section V, Paragraph 2 of the above Order, FMRI on behalf of itself and Fansteel, Inc. submits the following Report.

FMRI personnel are currently present on site to ensure that decommissioning activities are being conducted in compliance with NRC requirements, including FMRI's Radioactive Materials License (SMB-911), OPDES permit (OK0001643) and the NRC-approved decommissioning plan.

Subject to the availability of funding, FMRI personnel will continue to ensure compliance with the site's radiation protection program including conducting the required area radiation surveys, calibrating radiation detection equipment, and conducting personnel training. In addition, FMRI personnel will ensure the proper handling and storage of radioactive material prior to being shipped off-site, and will also maintain all emergency response and fire protection equipment and programs. Finally, FMRI personnel will continue to operate that site's wastewater treatment facility to ensure that groundwater and surface water is collected, treated and then sampled prior to the treated wastewater being discharged into the Arkansas River in compliance with FMRI's OPDES wastewater discharge permit.

FMRI personnel will also continue to maintain all site equipment and perform any needed repairs as well as continue to survey the site and equipment; provide site security and maintenance; decontaminate, survey and free-release scrap material from the site and maintain all the required site records. FMRI personnel are also on-site to escort governmental representatives around the site as necessary.

As indicated above, FMRI will continue to perform the above tasks subject to the availability of funding. To this end, FMRI has submitted a request to the NRC to pay the costs associated with the above tasks from the Decommissioning Trust. This request is still pending with the NRC.
