Revised Response

FCR No. 2-434 has been added to all controlled copies of drawing 2998-G-517 Revision 1 and FRC 2-557 has been removed from these drawings. A new, highly experienced document control supervisor has been acquired by the site to facilitate improvements in document/drawing control. Also, in order to assure that FCR and DCN notations are correct on design documents, a new position was created. The basic function of this position is to perform internal auditing of controlled drawings in the field. All necessary corrections to FCR and DCN notations on design documents will be made by September 24, 1979.
