Office of Nuclear Reactor Regulation
Attn: Mr. William Gammill
Acting Assistant Director
for Operating Reactors Projects
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Gammill:

Re: Turkey Point Units 3 and 4, St. Lucie Unit 1
Docket Nos. 50-250, 50-251 and 50-335
Station Electric
Distribution Systems

NRC letters dated July 23, 1979; July 26, 1979; and August 8, 1979 requested information concerning offsite power system and the onsite distribution system for our Turkey Point and St. Lucie nuclear power plants. The analyses which are required to respond to these requests are underway but have not yet been completed due to the demand being placed on our available engineering resources by concurrent NRC issues. Based on our current status, we should complete our analyses by November 8, 1979.

We plan to perform tests to demonstrate the adequacy of our onsite distribution system during the next extended outage of each unit. The next extended outage is scheduled to begin in November 1979 for Turkey Point Unit 3, and May 1980 for Turkey Point Unit 4 and St. Lucie Unit 1.

Florida Power & Light Company will submit a status report approximately November 8, 1979 to inform you of the results of our analyses and our plans for the final resolution of this matter.

We will notify NRC earlier of any items which are required to be reported by Facility Technical Specifications or NRC regulations.

Please feel free to call me if you should have any question in this matter.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
