Office of Nuclear Reactor Regulation
Attention: Mr. Harold R. Denton
Director
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

Re: St. Lucie Unit 1
Docket No. 50-335

This letter is being submitted for your information. On January 15, 1980 (L-80-24), Florida Power & Light Company provided information on projected power reliability in Southeast Florida during the months of February and March of this year. On March 3, 1980, Florida Power & Light Company had a new system one hour peak of 10,174 megawatts which included 450 megawatts being sold to Florida Power Corporation to help meet their system demand. If any of our nuclear plants had been shut down, we would not have been able to meet this demand.

Very truly yours,

E. A. Adornet
Exec. Vice Pres.
