Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

RE: St. Lucie Unit 1
Docket No. 50-335
Technical Support Center

The FPL letter, dated October 23, 1980 (L-80-353), indicated that the work on the plant data display computer and its associated equipment for the Technical Support Center was scheduled for completion by April 1, 1981.

This effort was contingent upon approval of a Technical Specification change, submitted April 18, 1980, which, when approved, would allow an increase in the Control Room Air Intake Limit. This increase was needed before the penetrations in the wall separating the TSC and the Control Room could be made for duct work and cable runs.

The required Technical Specification change was recently issued (February 25, 1981) and thus, has resulted in the necessity to reschedule the work on the Data Display Equipment for the TSC for completion by June 1, 1981.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
