

March 23, 1981

U.S. Nuclear Regulatory Commission
Office of Public Affairs
Washington, D. C. 20555

Dear Commission Staff;

A petition is hereby filed with respect to the issuance of the operating license of the Florida Power and Light Unit 2 of the St. Lucie Nuclear power plant site on Hutchinson Island, St. Lucie County, Florida.

The petitioner is Helen Shea Wells, 93 El Mar Drive Jensen Beach, Florida. The interest of the petitioner in these proceedings results from the following:

1. As an eight year resident of Beach Club Colony located on Hutchinson Island six miles south of the power plant I also represent 1500 property owners on the island.
2. These residents object to the complete lack of any safety precautions in the event of a nuclear accident.
3. The one narrow road, A-1-A has traffic problems now.
4. The alarming rate of construction approved by St. Lucie County commissioners plans for a population of approximately 20,000 people in a six mile area south of the plant.
5. The only exit is a bridge 18 miles north of the Martin County line and two bridges six & ten miles south of the nuclear plants in a different county, (Martin Co.)
6. During November-March there exists waits of 20 minutes getting on & off the island on the Martin County bridges.
7. Presently there exists no public warning system and there seems to be a dispute between the Department of Disaster Control in Martin & St. Lucie Counties as to which system should be used and whether Fla. Power & Light should pay for this system. This leaves the residents in the middle.

Petition re. St. Lucie Unit 2

The Hutchinson Island Coalition with its 1500 members is aware that the NRC staff will conduct safety and environmental reviews before it grants any license. However, we want to go on record with you to emphasize the urgent need for proper safety precautions. We hope that there will be a plan for evacuation just as soon as possible and we would appreciate your assistance in this matter at your earliest convenience.

The seven points as outlined show how we would be affected by the proceedings as well as the specific aspects.

Sincerely,

Helen Shea Wells
Director, Hutchinson Island
Coalition
