Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 2
Docket No. 50-389
Request for Additional Information, Core Performance Branch

Florida Power & Light Company (FPL) provided a response to the Core Performance Branch's request for additional information dated, March 18, 1981, directly to Mr. Victor Nerses, the St. Lucie Unit 2 Licensing Project Manager, during meetings between FPL and the NRC on April 23 and 24, 1981. FPL will formally document that response in Amendment 3 to the St. Lucie Plant Unit 2 Final Safety Analysis Report (FSAR) which will be submitted on or about May 30, 1981.

It is our intent to respond to future requests for information in this way, i.e. provide a response directly to Mr. Nerses for use of the reviewers, and then, formally document the response in a subsequent amendment to the FSAR or Environmental Report as applicable. This method provides the best use of our resources in providing timely responses to your requests for information. The use of this approach was discussed with Mr. Nerses, and if it presents any problems to you, we will be glad to consider other alternatives.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
