Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 1  
Docket No. 50-335  
Technical Support Center

The FPL letter, dated March 26, 1981 (L-81-176), indicated that the work on the plant data display computer and its associated equipment for the Technical Support Center was scheduled for completion by June 1, 1981.

Due to a number of significant difficulties that were encountered with the construction and system testing phases of the Technical Support Center, the completion of the data display system has been delayed.

We are presently working toward having the system operational by July 1, 1981. However, if this schedule changes due to further construction and system testing difficulties, the NRC Project Manager will be kept informed as to our progress.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
