4/22/81

Dear Chairman Joseph Hendrie,

I am a student attending ~~Wickham~~
Cuddey High School. I am writing to
you in protest over your handling of the
FPL affair. If I ^{had the} decision on the life
of your commission you would be dead.

You cannot realize the potential
environmental impact on the wild life
in the South Florida area to allow
the dumping of coolant radioactive material
in ~~some~~ ^{coaling} canals near Biscayne Bay
is pure madness.

The generators in the FPlant &
towers should be taken to a safe
area and disposed with. Your commission
is handling this about as well as 3 mile
island (Coney). If it were not for
Mark Oneavage you might have signed something
by us, but like all dishonest Govt. agencies
you were caught.

Sincerely yours,
Michael Turolla
