Office of Nuclear Reactor Regulation  
Attention: Mr. Robert A. Clark, Chief  
Operating Reactors Branch #3  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Clark:

Re: St. Lucie Unit 1  
Docket No. 50-335  
Post-TMI Requirements  
Safety & Relief Valve Testing

By letter dated July 1, 1981, R. C. Youngdahl (Consumers Power) transmitted the Interim Data Report for the EPRI PWR Safety and Relief Valve Test Program. This report summarizes the test data collected to date on relief valves (safety valve data is still not available). Our St. Lucie Unit 1 Plant has a Dresser model 31533VX-30 relief valve and a Crosby model HB-BP-86 safety valve. Relief and safety valves representative of the above valves are being tested in the EPRI program. Florida Power and Light will submit evaluations and other plant specific data on a schedule consistent with the R. C. Youngdahl letter of December 15, 1980 and modified on July 1, 1981.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology

REU/JEM/ras
