*ENV 2*

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

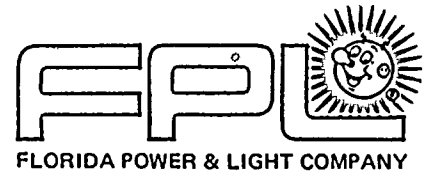

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both manual and automated processes, as well as the use of specialized software tools. The goal is to ensure that the data is both reliable and easy to interpret.

The final part of the document provides a detailed analysis of the results. It shows that there is a clear trend in the data, which is consistent with the initial hypothesis. This finding is significant and suggests that the current approach is effective.

The data shows a steady increase in the number of transactions over the period studied. This is likely due to a combination of factors, including increased market activity and improved operational efficiency. The overall trend is positive and indicates a strong performance.

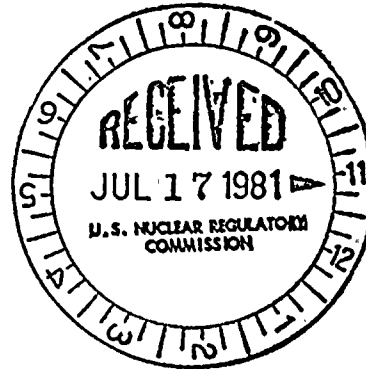

There are several key factors that have contributed to this success. These include the implementation of new technologies, the hiring of experienced staff, and the adoption of best practices in the industry. Each of these elements has played a crucial role in driving the growth.

Looking forward, the organization is well-positioned to continue its upward trajectory. By maintaining the current level of commitment and innovation, it can expect to achieve even greater success in the future. The data provides a solid foundation for these projections.

Office of Nuclear Reactor Regulation  
Attention: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 2  
Docket No. 50-389  
Amendment 3 to the Environmental  
Report - Operating License

In accordance with the requirements of 10 CFR 51.21, Florida Power & Light Company (FPL) is submitting forty-one (41) copies of Amendment 3 to the Environmental Report - Operating License, St. Lucie Plant Unit 2.

This amendment provides the FPL response to the May 5, 1981 Radiological Impact Section/Radiological Assessment Branch request for additional information (questions 470.1 - 470.6). Additional changes reflecting the ongoing technical review are also included.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
