

SEP 16 1981

MEMORANDUM FOR: DSI Assistant Directors
DE Assistant Directors
S. H. Hanauer, Director, Division of Human Factors Safety, NRR

FROM: R. L. Tedesco, Assistant Director for Licensing, DL

SUBJECT: Status of Staff Final St. Lucie 2 SER Inputs

As of September 14, 1981, the status of the staff final St. Lucie 2 SER official inputs by Branch is provided in the Attachment. Eighteen out of twenty-six branches have provided partial to no final input. It is necessary that the A/D take the required actions to correct this situation in order to assure that the SER issuance date is met. The attached indicates input received by SRP Section. Each branch should identify to the PM any remaining SER sections and corresponding SRP sections which have yet to be reviewed and/or completed.

I want to commend those branches who met the schedule input date. St. Lucie 2 is on an accelerated schedule and many of the branches, namely RSB, ASB, SEB, ICSB, ETSB, and CSB, rose to the occasion to meet the schedule and still maintain the high quality reviews. Of particular note was the performance of RSB. RSB was permitted to submit their input a week late because of the priority effort applied to SRP revisions; nevertheless, they still managed to meet the official 9/12/81 schedule date.
