

APPENDIX A

NOTICE OF VIOLATION

Florida Power & Light Company
St. Lucie 1

Docket No. 50-335
License No. DPR-67

As a result of the inspection conducted on July 11 - August 10, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violations were identified.

- A. Technical Specification 3.7.12.a requires that when all electrical penetration fire barriers protecting safety-related areas are not intact, a fire watch patrol must be established within one hour to inspect at least one side of the penetration(s).

Contrary to the above, fire barriers were not intact and a fire watch patrol was not provided on August 5, 1981 when several penetrations in the cable spreading/switchgear rooms were found open.

This is similar to a violation previously identified in January 1981, Inspection Report 50-335/81-02.

This is a Severity Level V Violation (Supplement I.E.).

- B. Technical Specification 6.8.1(a) requires that written procedures shall be established, implemented and maintained covering the applicable procedures recommended in Appendix "A" of Regulatory Guide 1.33, November 1972.

Contrary to the above, Health Physics Procedure HP-20, Radiation and Contamination Surveys, was not implemented in that, on August 3, 1981, a person was observed exiting the radiation controlled area at door 55 without attempting to "Frisk" for contamination. The inspector also found the frisker to be inoperable.

This is a Severity Level V Violation (Supplement I.E.).

Pursuant to the provisions of 10 CFR 2.201, you are hereby required to submit to this office within thirty days of the date of this Notice, a written statement or explanation in reply, including: (1) admission or denial of the alleged violations; (2) the reasons for the violations if admitted; (3) the corrective steps which have been taken and the results achieved; (4) corrective steps which will be taken to avoid further violations; and (5) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation.
