Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 1
Docket Nos. 50-335
Radiological Effluent
Technical Specifications

Florida Power & Light Company submitted proposed amendments to Appendices A and B of the St. Lucie Unit 1 Technical Specifications on March 15, 1979 (L-79-61) and August 23, 1979 (L-79-232) respectively. The proposed amendments were for changes to the facility's Radiological Effluent Technical Specifications pursuant to NUREG 0472. As discussed with your staff in a telephone conversation on November 20, 1981, we are in the process of reviewing those proposed amendments in order to reflect changes in equipment and operating conditions that have occurred during the last two years. We plan to resubmit the subject amendment requests subsequent to their review. Although our review may not be completed, we expect to be prepared to discuss any proposed revisions at the time of the meeting which your staff requested and which is now tentatively scheduled for January.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology

REU/JEM/ras
