1. The purpose of this document is to provide a comprehensive overview of the current status of the project. It is intended for the use of management and other stakeholders who are involved in the project's execution.

2. The project has been initiated and is currently in the planning phase. The primary objective is to ensure that all project goals are met within the specified budget and timeline.

3. The project team has identified several key risks that could impact the project's success. These risks are being actively monitored and managed to minimize their potential impact.

Office of Nuclear Reactor Regulation
Attention: Robert A. Clark, Chief
Operating Reactors Branch #3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Clark:

Re: St. Lucie Unit 1
Docket No. 50-335
Post-TMI Requirements
RCS Vent System Procedures

The purpose of this letter is to transmit to you a copy of our "draft" Reactor Coolant Gas Vent System Off-Normal operating procedure. The procedure has been reviewed by the St. Lucie Facility Review Group but has not been approved for use. However, it was found to be acceptable for transmittal as an approved draft of the procedure. We trust that the enclosed procedure will facilitate the NRC staff's review and approval of our Reactor Coolant Gas Vent System.

Very truly yours,

J. a. De Mistry
jr

Robert E. Uhrig
Vice President
Advanced System and Technology
