Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 1
Docket No. 50-335
Proposed Amendment to Facility Operating
License DPR-67: Beach Dune Survey Report

In accordance with 10 CFR §§50.90 and 50.30 Florida Power & Light Company (FPL) herewith submits three originals and 40 copies of a request to amend Appendix A to Operating License DPR-67 for St. Lucie Unit 1. The amendments are shown on the attached Technical Specification pages bearing the date of this letter in the lower right hand corner.

This request modifies the time limit of Appendix A Technical Specification 4.7.6.1.1 from 10 days to 30 days within which the Beach Dune Survey results must be submitted to the Commission after completion of the survey. Due to logistics such as travel time, data analysis, typing and mailing time, it is extremely difficult to meet the 10 day reporting requirement. The results of these surveys, which were initiated in 1976, have indicated that there has been no significant change on the beach or in the dune profiles during the last five years. On that basis, there does not seem to be cause for such an extreme level of concern as would be indicated by the 10 day requirement.

Since we presently have outstanding several Technical Specification proposals, it is requested that this minor change be considered with our request of October 27, 1980 (L-80-354).

The proposed amendments have been reviewed by the St. Lucie Facility Review Group, the Company Environmental Review Group, and the Company Nuclear Review Board. They have determined that the proposed amendments are administrative in nature and will result in no adverse effects on the environment.

Very truly yours,
