This refers to the routine safety inspection conducted by Mr. S. A. Elrod of this office on December 11, 1981 - January 10, 1982, of activities authorized by NRC Operating License No. DPR-67 and Construction Permit No. CPPR-144 for the St. Lucie facility. Our preliminary findings were discussed with Mr. C. M. Wethy, Plant Manager, at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspectors.

This item and references to pertinent requirements are listed in the Notice of Violation enclosed herewith as Appendix A. Elements to be included in your response are delineated in Appendix A.

One new unresolved item is identified in the enclosed inspection report. This item will be examined during subsequent inspections.
