Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 1
Docket No. 50-335
Proposed License Amendment
Minimum Shift Crew Composition

In accordance with 10 CFR 50.90, Florida Power & Light Company submits herewith three signed originals and forty copies of a request to amend Appendix A of Facility Operating License DPR-67.

This amendment is submitted as an administrative change in response to the Post-TMI Requirements contained in Item I.A.1.3 of NUREG-0737 which requested that we propose a Technical Specification change to increase our minimum shift crew composition.

The proposed amendment is described below and shown on accompanying Technical Specification page.

Table 6.2-1

This table is changed to add a second Senior Reactor Operator to the minimum shift crew. In addition, the table addresses the future operation of St. Lucie Unit 2.

The proposed amendment has been reviewed and approved by the St. Lucie Facility Review Group and the Florida Power & Light Company Nuclear Review Board.

In accordance with 10 CFR 170.22, no license fee is required because the proposed amendment is submitted in response to an NRC request.

Very truly yours,

foe Robert E. Uhrig
Vice President
Advanced Systems and Technology
