MEMORANDUM FOR: Those on Attached List

FROM: Victor Nerses, Project Manager  
Licensing Branch #3  
Division of Licensing

SUBJECT: BACKGROUND INFORMATION FOR THE ST. LUCIE 2 ENGINEERING  
VERIFICATION PROGRAM (EVP)

On April 27, 1982, we had a management meeting with Florida Power & Light Company (FP&L) regarding their quality assurance and control program for St. Lucie 2.

The applicant presented and described the quality systems used and verifications performed to assure that (1) the design of St. Lucie 2 is carried out in a planned, controlled and correct manner; (2) all applicable design bases and commitments are incorporated; (3) structures, systems and components are manufactured and constructed in accordance with the specific design and (4) all NRC regulatory requirements and guidance are met. During this meeting FP&L described an EVP they were initiating to provide additional assurance of the quality of their design process.

The staff had some reservations regarding their approach for assuring the independence of their program and we formally informed FP&L of this and requested a meeting between the staff and the EVP Task Managers. The purpose of the meeting is for the staff to discuss firsthand the EVP with the Task Managers and the measures used to assure the independence of the EVP.

The attached documents (reports from the EVP Task Managers) provide some background information for your use on the EVP activities taken place thus far.

For any questions on the attached documents or the meeting, please contact Vic Nerses (X27318), Project Manager, St. Lucie 2.

Victor Nerses, Project Manager  
Licensing Branch #3
