Office of Nuclear Reactor Regulations
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit No. 2
Docket No. 50-389
ICC Instrumentation (TMI Item II.F.2)

As stated in Florida Power and Light Company (FPL) letter L-82-434 dated October 8, 1982, the implementation of the ICC instrumentation package is still in progress and will be fully operational by mid 1983. Since the issuance of Amendment 12 to the Final Safety Analysis Report in August, 1982, modifications to the system have been documented through submittals to the NRC which have been placed on the St. Lucie Unit 2 docket. The intent of this letter is to inform the staff that modifications to the ICC system will be included in the next revision to the St. Lucie Unit 2 Final Safety Analysis Report.

If you have any questions regarding this submittal, please contact us accordingly.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems and Technology
