All remaining open unresolved item (discrepancy) reports from the independent design review (Phase I), field installation verification (Phase II), and start-up operation verification (Phase III) were addressed by the EVPRC. As in previous meetings, the resolutions were documented on the individual reports (UIR for Ebasco and EVP-U for C-E).
- B. In summary, a total of 56 UIRs and 28 EVP-U reports were prepared by the Task Force during the engineering verification program. Seven UIRs and one EVP-U were classified by the EVPRC as observations and transmitted to the Project Team for action. The remaining 49 UIRs and 27 EVP-U reports were resolved and recorded as closed out.
- C. A discussion of the Final Report draft was held, including a determination of how it would be submitted to the NRC. (A draft package was delivered to NRC December 17)
