Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit 2
Docket No. 50-389
Engineering Verification Program

During discussions with the Nuclear Regulatory Commission in April 1982, Florida Power and Light Company (FPL) was requested to provide assurance that St. Lucie Unit 2 has been constructed in accordance with the design and to verify the Quality of the project. Following those discussions, FPL developed an Independent Engineering Verification Program.

Enclosed please find a description of FPL's Engineering Verification Program, the final report of the Engineering Verification Program Task Force, and additional information describing how FPL has been committed to assuring a quality product in the design and construction of St. Lucie Unit 2.

Should you have any questions concerning this package, please do not hesitate to contact us.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology
