CORRESPONDENCE TO NRC  
AFFECTING PLANT CONFIGURATION

In recent conversations with members of your staff, FP&L was requested to provide the NRC with a list of FP&L docketed letters whose content may affect the St. Lucie Unit No. 2 plant configuration as described in the FSAR (as amended). FP&L has compiled a list of correspondence to the NRC which have modified various sections of the Final Safety Analysis Report (FSAR).

Please find attached the list which your staff requested. The letters listed on the attached will be incorporated into the upcoming Amendment No. 14 to the FSAR.

Should you have any questions regarding this submittal, please do not hesitate to contact us.

Very truly yours,

Robert E. Uhrig  
Vice President
