Dear Mr. Clark:

Re: St. Lucie Unit I
Docket No. 50-335
Reactor Vessel Internals and Thermal Shield;
Plant Recovery Program

In our letter of April 19, 1983 (L-83-230), Florida Power & Light committed to provide a Safety Assessment, to include the subject of "possible effects on fuel performance due to loose parts" (item D(2)).

As an enclosure to this letter, please find such assessment. No objective evidence to date is indicative of anomalous fuel failure or fuel problems since the first cycle of St. Lucie operation.

Very truly yours,
