Office of Nuclear Reactor Regulation
Attention: Mr. Robert A. Clark, Chief
Operating Reactors Branch #3
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Clark:

Re: St. Lucie Unit 1
Docket No. 50-335
Equipment Qualification

Attached please find our schedule for qualification or replacement of the equipment important to safety within the scope of 10 CFR 50.49. Further documentation will be prepared to demonstrate that equipment committed to be qualified meets its specified requirements and will perform its safety related function up to the end of its qualified life. Equipment with a "To Be Replaced" commitment will be replaced with qualified equipment in accordance with the requirements of 10 CFR 50.49. Items with a "Remove from List" commitment are being evaluated for removal from the list of equipment requiring qualification as a result of procedural changes that eliminate the need for this equipment to be qualified. Most of these items were identified in the NRC Technical Evaluation Report as items that did not need to be included in the scope of IE Bulletin 79-01B. The remaining items are those whose function will be replaced by other equipment.

This completes our reporting requirements as specified in 10 CFR 50.49.

If you have any question regarding the attached, please contact us accordingly.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems & Technology

A048

REU/PLP/cab

cc: Mr. James P. O'Reilly, Region II
Harold F. Reis, Esquire
