TEHQ FILE COPY

MEMORANDUM FOR: R. L. Lewis, Director, Division of Project and Resident Programs, Region II

FROM: U. Potapovs, Chief, Vendor Program Branch, Division of Vendor and Technical Programs, Region IV

SUBJECT: CLOSEOUT OF (AITS) NO. F02700270 - BROKEN PHASE INSULATORS IN HEAT TRACE PANELS (VITS NO. 82-229)

A Vendor Program Branch (VPB) inspection was performed on April 25-27, 1983, at the Nelson Electric plant in Tulsa, Oklahoma, which included the subject in the scope.

From the available information, it would appear that the identified damage to the electrical supply panels was the result of gross mishandling during either shipping or after receipt at the St. Lucie Plant, Unit 2 site. The VPB has now closed this AITS item.

Should you have any questions or require any additional information, please contact Messrs. J. W. Hamilton (728-8268) or I. Barnes (728-8176).
