Office of Nuclear Reactor Regulations
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: ST. LUCIE UNIT NO. 2
DOCKET NO. 50-389
FSAR AMENDMENT 14

In a letter dated March 21, 1983 (L-83-163), Florida Power & Light Co. formally committed to issue Amendment 14 to the St. Lucie Unit No. 2 Final Safety Analysis Report (FSAR) approximately four months following the issuance of the St. Lucie Unit No. 2 Operating License. At that time, the scope of the amendment was going to be limited to updating the Fire Protection section to include Appendix "R" commitments and incorporating into the text applicable docketed letters.

In order to produce an FSAR which would closely resemble the as-built condition, FP&L has decided to expand the scope of this amendment. The revised scope will include the following: 1) Revision of the Fire Protection write-up to include Appendix "R" commitments, 2) Incorporation of the applicable docketed letters, 3) Revision of the P & I diagrams to reflect "as-built" condition as of April 6, 1983, 4) Incorporation of approximately 700 questions and answers into the FSAR text, 5) A thorough review will be performed to ensure that the FSAR text reflects the conditions at the St. Lucie site.

This revised scope will require some additional time, therefore, Amendment 14 will not be issued until November, 1983. Until the issuance of Amendment 14, FP&L will maintain at the site a copy of all docketed letters since Amendment 13 for use by the regional inspectors.

Very truly yours,

Robert E. Uhrig
Vice President
Advanced Systems and Technology
