Office of Administration  
Attention: Mr. William O. Miller, Chief  
License Fee Management Branch  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Miller:

Re: St. Lucie Unit No. 2  
Docket No. 50-389  
License Amendment Fees

In response to your letters of May 20, 1983 and July 21, 1983, enclosed please find a check in the amount of \$1,200.00 for a Class II license amendment fee.

The proposed Technical Specification changes for channel functional test Surveillance Requirements for Wide Range Logarithmic Neutron Flux Monitor, were administrative in nature in that the surveillance requirement was applicable only to proportional counter flux monitors, and therefore, not applicable to the Wide Range Logarithmic Neutron Flux Monitor which is a fission chamber detector.

The proposed Technical Specification changes in requirements for primary and secondary coolants in steam generators submitted in our April 20, 1983 application were superceded by our June 17, 1983 (L-83-349) application. The license amendment fee was remitted for the June 17th application on July 7, 1983.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
