Office of Nuclear Reactor Regulation  
Attention: Mr. James R. Miller, Chief  
Operating Reactors Branch #3  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Miller:

Re: St. Lucie Unit I  
Docket No. 50-335  
Reactor Vessel Internals and Thermal Shield;  
Plant Recovery Program

On August 16, 1983, Florida Power and Light Company provided you with a presentation on St. Lucie Unit I Core Support Barrel Inspection, Repair, and Analysis, and Thermal Shield Removal. In addition, a revised St. Lucie Unit No. I Recovery Plan (Revision 2) status was discussed during the August 16th meeting and a copy forwarded in our letter of August 22, 1983 (L-83-452).

In order that our presentation of Non-Destructive Examination (NDE) data be refined and consolidated into pre and post Core Support Barrel (CSB) Lug removal states, the St. Lucie Unit No. I Recovery Plan (Revision 3) has been revised and is herein forwarded.

This subject has been discussed with Mr. Don Sells of your office on September 6, 1983. Should any questions arise, please contact us immediately.

Very truly yours,

Robert E. Uhrig  
Vice President  
Advanced Systems & Technology
