Gentlemen:

SUBJECT: TRAINING ASSESSMENT TEAM INSPECTION AT THE ST. LUCIE FACILITY

This letter announces the conduct of an NRC Training Assessment Team inspection at the St. Lucie site during the period of September 26-30, 1983, in order to facilitate your making available, onsite, the personnel and records needed to properly complete the inspection effort.

This inspection is being conducted as a part of a Region II-wide assessment of licensee training programs. The inspection will include an assessment of the overall corporate involvement in training at all FP&L Company nuclear facilities. Our visit to your corporate offices will be arranged separately. A number of Region II facilities have already received this training assessment. It is our intent that all Region II licensee programs will be assessed. A more detailed listing of the items to be examined is enclosed.

Should you have any questions regarding this activity, please do not hesitate to contact this office.

Sincerely,

R. C. Lewis, Director
 Division of Project and
 Resident Programs
