Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit No. 2
Docket No. 50-389
Natural Circulation Cooldown/Boron Mixing

Florida Power & Light Company letter L-83-437, dated August 3, 1983, stated that the detailed analysis of the test data obtained during the San Onofre Natural Circulation Cooldown Test would be performed on a generic basis through the Combustion Engineering Owners Group, and that the results of the detailed analysis should be available by the end of 1983.

The purpose of this letter is to inform you that the results of the detailed analysis will be available for review by the Owners Group by the end of 1983, and that a meeting with Southern California Edison has been scheduled for the first week in January 1984, to resolve the commercial aspects of using San Onofre data for St. Lucie. A schedule for submitting the report to NRC will be developed in that meeting and forwarded to NRC.

Very truly yours,

J. W. Williams, Jr.
Vice President
Nuclear Energy
