Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit No. 1
Docket No. 50-335
Proposed License Amendment
Appendix B - Environmental Protection Plan

In accordance with 10 CFR 50.90, Florida Power & Light Company submits herewith three signed originals and forty copies of a request to amend Appendix B of Facility Operating License DPR-67.

This amendment is submitted to delete the radiological technical specifications in Appendix B (Appendix B, Part I).

The Radiological Effluent Technical Specifications (RETS), which were issued on August 18, 1983 as Amendment 59, include and/or supercede all of the radiological technical specifications that are in Appendix B. Therefore, the Appendix B radiological technical specifications should be deleted.

The proposed amendment consists of deleting Part I of the current Appendix B such that Appendix B will contain only Part II, Environmental Protection Plan. A replacement page for Part I is attached.

In accordance with 10 CFR 50.91 (b)(1), a copy of this proposed license amendment is being forwarded to the State Designee for the State of Florida.

In accordance with 10 CFR 50.91 (a)(1), and as discussed in the attached safety evaluation, we have determined that this amendment is administrative in nature and does not involve any significant hazards considerations pursuant to 10 CFR 50.92(c) in that the amendment does not:

- (1) involve a significant increase in the probability or consequences of an accident previously evaluated because this amendment is administrative in nature and does not involve any inputs used in accident analyses or influence the consequences of any accidents previously evaluated; or
- (2) create the possibility of a new or different kind of accident from any accident previously evaluated because this amendment is administrative in nature and in no way is involved with accidents; or

8401130296 840110
PDR, ADCK 05000335
P PDR

Page 2

Mr. Darrell G. Eisenhut, Director
U. S. Nuclear Regulatory Commission

- (3) involve a significant reduction in a margin of safety because this amendment is administrative in nature and does not involve any margins of safety.

The current Appendix B, Part I requirements have been included with and/or superceded by the RETS. Deletion of Appendix B, Part I should have occurred concurrent with issuance of the RETS. Therefore, this amendment is pro forma, administrative in nature, and has no safety or environmental significance. As such, a check for \$1200.00 for a Class II amendment will follow shortly.

Very truly yours,

J. W. Williams, Jr.
Vice President
Nuclear Energy

JWW/RJS/cab

Attachment

SAFETY EVALUATION

On August 18, 1983, NRC issued Radiological Effluent Technical Specifications (RETS) as Amendment No. 59 to Operating License DPR-67. The RETS included and/or superceded Appendix B, Part I requirements. However, Appendix B, Part I was not deleted as part of Amendment No. 59. Therefore, this amendment is pro forma, administrative in nature, and of no safety or environmental significance.

NO SIGNIFICANT HAZARDS CONSIDERATION

As stated in the above Safety Evaluation; this amendment is pro forma, administrative in nature, and of no safety or environmental significance. This amendment is similar to the guidance embodied in examples (i) and (vii) referenced in the Staff's procedures. Example (i) is for a purely administrative change to a technical specification. Deletion of Appendix B, Part I will eliminate the duplicate and in some cases inconsistent requirements that currently exist between the RETS and Appendix B, Part I technical specifications. Example (vii) is for a change to make a license conform to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations. Issuance of the RETS amendment which conforms to 10 CFR 50 Appendix I requirements is the reason for deletion of the Appendix B, Part I technical specifications. Furthermore, deletion of Appendix B, Part I technical specifications results in no change or very minor changes to facility operations and is clearly in keeping with the regulations. St. Lucie Unit 2 has essentially identical RETS, with no effluent technical specifications in Appendix B to the St. Lucie Unit 2 technical specifications. Based on the above, we have determined that this amendment involves no significant hazards considerations.

APPENDIX B - PART I

DELETED

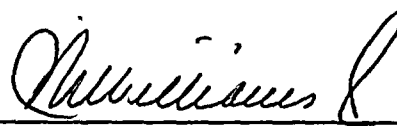

AMENDMENT NO.

STATE OF FLORIDA)
)
COUNTY OF DADE) ss.

 J. W. Williams, Jr. , being first duly sworn, deposes and says:

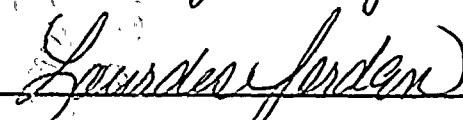

That he is a Vice President of Florida Power & Light Company, the Licensee herein;

That he has executed the foregoing document; that the statements made in this document are true and correct to the best of his knowledge, information, and belief, and that he is authorized to execute the document on behalf of said Licensee.

J. W. Williams, Jr.

Subscribed and sworn to before me this
 10th day of January , 19 84 .

NOTARY PUBLIC, in and for the County
of Dade, State of Florida.
