Mr. J. W. Williams, Jr.
Vice President
Nuclear Energy Department
Florida Power & Light Company
P. O. Box 14000
Juno Beach, Florida 33408

Dear Mr. Williams:

SUBJECT: COMPLIANCE WITH GENERIC LETTER 82-16

Generic Letter 82-16 contained guidance on certain NUREG-0737 items and acceptance criteria for associated Technical Specifications. The staff, through its consultants, EG&G, reviewed the Technical Specifications for both St. Lucie Plant Unit Nos. 1 and 2 using this guidance and acceptance criteria. The results of this review are contained in EG&G's Technical Evaluation Report (enclosed).

The staff has reviewed the EG&G Report and agrees with the conclusions that St. Lucie 2 conforms to Generic Letter 82-16 and that St. Lucie 1 does not. For St. Lucie 1 deviations include:

- 1) overtime limits,
- 2) purge valves, and
- 3) relief valve and safety valve failures and challenges.

The details of these deviations are contained in the Technical Evaluation Report.

It is requested that you review the enclosed Report and provide a response that addresses the identified deviations for St. Lucie 1 within thirty days of receipt of this letter. If this date cannot be met, please advise us of a date that you can meet.

If you have any questions concerning this request, contact the project manager, D. Sells, at (301) 492-9735.

The reporting and/or recordkeeping requirements contained in this letter affect fewer than ten respondents; therefore, OMB clearance is not required under P.L. 96-511.

Sincerely,

Original Signed by J. R. Miller

James R. Miller, Chief
Operating Reactors Branch #3
Division of Licensing

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author details the various methods used to collect and analyze the data. This includes both manual and automated processes. The goal is to ensure that the information gathered is both reliable and comprehensive.

The third part of the report focuses on the results of the analysis. It shows a clear trend in the data over the period studied. These findings are crucial for understanding the underlying patterns and making informed decisions.

Finally, the document concludes with a series of recommendations based on the findings. It suggests several ways to improve the current processes and to better utilize the data collected. The author believes these steps are essential for long-term success.

The author expresses their confidence in the accuracy of the data and the validity of the conclusions. They hope that this report will be helpful to all those who are interested in the subject.
