

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

AUG 02 2017

John P. Lowden M.S.  
Radiation Safety Officer  
Goshen Health  
200 High Park Ave.  
Dept. of Nuclear Medicine  
Goshen, IN 46526

Dear Mr. Lowden,

Enclosed is Amendment No. 62 to your U.S. Nuclear Regulatory Commission (NRC) Material License No. 13-18845-01 for Goshen Health in accordance with your requests dated April 28 and July 13, 2017. Your letters are available electronically from the NRC's Agencywide Documents Access and Management System (ADAMS) at Accession nos. ML17125A158 and ML17198C385, respectively.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers. Please note that we have authorized Syed I. Ali, M.D. for use of Title 10 Code of Federal Regulations (CFR) 35.100, 35.200, 35.300 (limited to the oral administration of sodium iodide I-131 in quantities of 33 millicuries or less), and 35.1000 (limited to yttrium-90 in SIR-Spheres) material as requested.

In your request dated April 28, 2017, you provided close-out survey and wipe test results for a location, a shed located behind the hospital, in Goshen, Indiana. In your letter dated June 30, 2017 (ML17206A115), you provided additional information. In your correspondence, you confirmed that all residual licensed material used at the location had been removed – such that any remaining residual radioactivity in that area of use is within the limits of 10 CFR Part 20, Subpart E.

Based on its review of close-out survey information, the staff has concluded that all licensable radioactive material has been removed from the location of use and residual radioactive material attributable to licensed activities in that area of use does not exceed current NRC criteria. Therefore, the area of use is suitable for unrestricted use.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. The NRC may issue a notice of violation, imposition of a civil penalty, or an order suspending, modifying

or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR Section 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security-related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from ADAMS, accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Magdalena R. Gryglak
