Docket No. 50-335

Florida Power & Light Company  
 ATTN: Mr. C. W. Williams, Jr., Vice President  
 Nuclear Energy Department  
 Post Office Box 14000  
 Juno Beach, Florida 33408

Gentlemen:

By letter dated November 9, 1983, we informed your Company that a Class III fee (\$4,000) was due for your application dated September 16, 1983, for Technical Specification changes relating to Containment Leakage Paths, Penetration 25, for St. Lucie Plant Unit No. 1. By letter dated December 19, 1983, your Company remitted a Class II fee (\$1,200) since you determined the amendment to be administrative in nature.

The Division of Licensing (DL) staff informed you by letter dated March 14, 1984, of their approval of your application and issued Amendment No. 64 to Facility Operating License No. DPR-67. Based on information provided by the DL staff as the result of their final review of your application, it has been determined that the previously requested Class III fee (\$4,000) is appropriate because the review did involve consideration of a single safety issue. We understand from the DL review staff that only that related portion on renaming the "blind flange" is considered to be administrative in nature. Therefore, you are requested to remit the additional sum of \$2,800 to this office.

In addition, for your application dated August 25, 1983 (L-83-460), your Company remitted a Class II fee of \$1,200 by letter dated September 9, 1983 (L-83-483) and provided your basis for this fee. Our letter dated September 19, 1983, informed you that a Class III fee was appropriate for this application since the review would involve consideration of a single safety issue. When the review of this application is completed by the DL staff and they provide us with a final fee determination for it, we will inform you of their determination.

Sincerely,

Original Signed by:  
 Reba M. Diggs
