L-84-154
June 19, 1984

Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit Nos. 1 & 2
Docket Nos. 50-335 & 50-389
Fire Brigade Training

Florida Power & Light Company letters L-84-129, dated May 15, 1984 and L-84-130, dated May 21, 1984, requested changes to the St. Lucie Plant Units 1 & 2 technical specifications respectively. The requests were made to obtain more consistency between the technical specifications, to incorporate Generic Letter 83-43 recommendations on the reporting requirements of 10 CFR 50.72 and 50.73, and on Unit 1 in accordance with FPL letter L-64-67 dated March 8, 1984, to include specifications on overtime restrictions and reporting of challenges to safety and relief valves. All of the changes were determined to be administrative in nature.

Although a change involving Technical Specification 6.4.2 was proposed in the application for Unit 1, a further change which deletes Technical Specification 6.4.2 was not identified in either of the applications, but should have been included with them. This specification, regarding Fire Brigade training, is unnecessary in that 10 CFR Part 50, Appendix R, Section III.I. specifies the requirements for Fire Brigade Training, that includes instruction, practice, drills, and records. Since the requirements for fire brigade training are specified in NRC regulations, there is no need to retain a specific technical specification.

Therefore, it is requested that in your review of the proposed license amendments, you consider deletion of Technical Specification 6.4.2.

Very truly yours,

J. W. Williams, Jr.
Group Vice President
Nuclear Energy
