

Federal Emergency Management Agency

Washington, D.C. 20472

JUL 9 1984

MEMORANDUM FOR: Edward L. Jordan
Director, Division of Emergency Preparedness
and Engineering Response
Office of Inspection and Enforcement
U.S. Nuclear Regulatory Commission

FROM: *Richard W. Krimm*
Richard W. Krimm
Assistant Associate Director
Office of Natural and Technological Hazards
Programs

SUBJECT: Exercise Report for the March 6, 1984, Exercise of
the Offsite Radiological Emergency Preparedness
Plans for the St. Lucie Nuclear Power Plant

Attached are two copies of the Exercise Report for the March 6, 1984, full participation joint exercise of the offsite radiological emergency preparedness plans for the St. Lucie Nuclear Power Plant. The State of Florida, and St. Lucie and Martin Counties, which are located in the 10-mile plume emergency planning zone (EPZ), participated in the exercise. The exercise report, dated March 24, 1984, was submitted on May 4, 1984, by Region IV of the Federal Emergency Management Agency (FEMA) and includes the comments resulting from the Regional Assistance Committee review.

FEMA Region IV staff will furnish a copy of this exercise report to the State of Florida. There were very few specific NUREG-0654/FEMA-REP-1, Rev. 1, deficiencies observed during the exercise activities. These deficiencies are discussed in Part II, Detailed Discussion. A listing of these deficiencies is also included in Part III of the report, Summary Listing of Deficiencies. All deficiencies noted can be corrected largely through training and the procurement of resources and equipment. A schedule of corrective actions will be requested from the State. As soon as we receive and analyze their response, we will send you the results.

Although there were deficiencies observed at this exercise, they did not detract from the overall demonstrated capability by the State of Florida and St. Lucie and Martin Counties to protect the health and safety of the public. In light of this, the Federal Emergency Management Agency 44 CFR 350 approval of the State and local plans for the St. Lucie Nuclear Power Plant will remain in effect.

If you have any questions, please contact Mr. Robert S. Wilkerson, Chief, Technological Hazards Division, at 287-0200.
