Office of Nuclear Reactor Regulation
Attention: Mr. Darrell G. Eisenhut, Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Eisenhut:

Re: St. Lucie Unit No. 2
Docket No. 50-389
Refueling Canal Sump Pump

Florida Power & Light Company letter L-82-434, dated October 8, 1982, stated that a permanent refueling canal pumping system would be installed prior to the first refueling outage. We have re-evaluated the need for a permanent system and have determined that this modification is not necessary. As stated in L-82-434, the modification does not affect any safety related system or system operations, nor does this system serve any safety function. Therefore, a permanent refueling canal pumping system will not be installed at this time.

Very truly yours,

J. W. Williams, Jr.
