Docket No. 50-335

Florida Power and Light Company ATTN: Mr. J. W. Williams, Jr. Group Vice President Nuclear Energy Post Office Box 14000 Juno Beach, Florida 33408

Gentlemen:

By letter dated September 5, 1984, the Division of Licensing (DL) staff informed your Company of their approval of your application dated May 21, 1984, and issued Amendment No. 68 to Facility Operating License DPR-67 for the St. Lucie Plant Unit No. 1. This application proposed certain Technical Specification (TS) changes in accordance with NUREG-0737 requirements. Fees pursuant to 10 CFR 170.22 of the March 23, 1978 regulations were not submitted with your application since your Company determined fees were not required because the changes were requested by the NRC.

Based on information provided by the ONRR staff as the result of their final review of your application, it has been determined that a Class III fee (\$4,000) is appropriate since the review involved consideration of a single safety issue. Therefore, you are requested to remit the sum of \$4,000 to this office.

When applications such as yours are requested for the purpose of enhancing the safe operation of a nuclear facility or to correct a problem or potential problem relating to the operation of the facility, they are not exempt under Footnote 2 of 10 CFR 170.22 of the March 23, 1978 regulations because they are not for the purpose of simplifying or clarifying the license or TS for the convenience of the NRC.
