Office of Nuclear Reactor Regulation
Attention: Mr. Hugh L. Thompson, Jr.
Director, Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Thompson:

Re: St. Lucie Unit No. 2
Docket No. 50-389
Proposed License Amendment
Containment Ventilation System

Florida Power & Light Company letter L-84-225, dated August 31, 1984, requested an amendment to Appendix A of Facility Operating License NPF-16, to modify the existing technical specification for the 8-inch containment purge supply and exhaust isolation valves. In reviewing that application, NRC suggested several minor changes that would make the proposed change more acceptable. We have evaluated those suggestions, and attached is the revised technical specification page 3/4 6-14. This page replaces that page submitted with the August 31, 1984 application.

Very truly yours,

J. W. Williams, Jr.
Group Vice President
Nuclear Energy

JWW/RJS/cab
