Dear Mr. Ippolito:

The subject report has been transmitted to the NRC by General Electric via L. J. Sobon's letter to V. Stello, dated August 15, 1978. This report compares the allowable downcomer lateral load based on collapse testing to the allowable load based on stress analysis and ASME code allowable stresses in the Mark I plants and was provided as part of Task 3.1.5.2 of the Mark I Containment Program. The report, "NEDE-21887-P", should be included on the Dresden Station Units 2 & 3 and Quad-Cities Station Units 1 & 2 dockets.

Very truly yours,
