 SERVICES UNIT

Mr. George E. Lear, Chief
 Operating Reactors - Branch 3
 Division of Operating Reactors
 U.S. Nuclear Regulatory Commission
 Washington, D.C. 20555

Subject: Dresden Station Units 2 and 3
 Quad-Cities Station Units 1 and 2
 General Electric Report NEDC-23702-P,
 "Mark I Containment Program, Seismic
 Slosh Evaluation"
NRC Docket Nos. 50-237/249/254/265

Dear Mr. Lear:

The subject report has been transmitted to the NRC by General Electric via L. J. Sobon's letter to V. Stello dated March 30, 1978. This report presents the results of an analytical study and scale model tests to determine seismically induced slosh amplitudes and slosh pressures and was provided as part of Task 5.4 of the Mark I Program. The report, "NEDC-23702-P," should be included on the Dresden Station Units 2 and 3 and Quad-Cities Station Units 1 and 2 dockets.

Very truly yours,

M. S. Turbak
