NRC Dockets Nos. 50-237 749 and

Sobon (G.E.) to Mr. V. Stello (NRC).

Dear Mr. Ziemann:

Commonwealth Edison has reviewed Addendum 4 to the Mark I Containment Short Term Program Report, NEDC-20989 transmitted to NRC by Reference (a) and has determined that the information contained in that addendum accurately reflects the status of the Commonwealth Edison units referenced therein. Addendum 4 identifies those revisions that should be made to the text in Volumes I, IV and V of the Short Term Program Report to reflect the status of all plants affected by structural modifications, additional loading information, and/or additional analysis completed as of October 1, 1976. It is requested that this addendum be incorporated onto the NRC dockets for Dresden Units 2 and 3, and Quad Cities Units 1 and 2.

One (1) signed original and 39 copies of this letter are being transmitted for your use.

Very truly yours,

G. A. Abrell
